

NEPTUNE'S HARVEST

ORGANIC CRAB SHELL

CS 604	4 Lb Bag	Case Pack 6
CS 612	12 Lb Pail	Case Pack 4
CS 650	50 Lb Bag	Case Pack 1

Neptune's Harvest Organic Crab Shell is high in Calcium (23%). This will give you good protection against blossom end rot and plants actually need more Calcium than Nitrogen. A hidden benefit with Crab Shell is the fact that it is high in Chitin. This will promote the Chitin-eating bacteria in the soil. These Chitin eating bacteria will protect your plants from Fungus, root-eating Nematodes, Grubs and Ants, which are Chitin based in structure. They leave Chitin in the soil which dissolves Chitin.

Crab Shell can help prevent blossom end rot.

Crab Shell is also high in chitin and will promote the growth of chitin eating organisms in the soil.

The eggs of nematodes, the exoskeletons of fungus, the jaws of Japanese beetle grubs and the bodies of ants are high in chitin.

Crab Shell helps to create a hostile environment by feeding the biological life that eats chitin and chitin based organisms.

Crab Shell will discourage slugs and snails when used to circle a plant.

Crab Shell will discourage small animals from digging in the garden when mixed in the soil.
