

ALL NATURAL  
**ORGANIC**

**Neptune's Harvest  
Organic Fertilizers**

## **Turf Formula 2-0-2**

***Developed for turf professionals as a liquid aeration product and as a great organic fertilizer with broad spectrum macro and micronutrients.***

Our Turf Formula is an environmentally-friendly fertilizer containing the perfect blend of nutrients for all your turf and soil needs. This product is a storehouse of over 60 major and minor chelated nutrients plus amino acids. Our Turf Formula can be used on all grass types and all turf situations. Turf Formula increases nutrient efficiency, root mass and microbial activity while decreasing the costs of other inputs. It will provide necessary nutrients for tolerating environmental conditions such as high temperature and drought, while offering plenty of macro- and micro-nutrients for improved vigor, color, turf thickness, turf health, and root-density while increasing microbial growth. Golf course superintendents and landscapers across the country have been using Turf Formula for years with great success. This product is flexible enough to be mixed with other inputs, eliminating the need for separate applications. Results can often be seen within days!

**Ingredients:** Hydrolyzed Fish, Molasses, Seaweed, Humates, and Yucca Extract.

**Available Sizes:** 1 gallon and 5 gallon containers. Bulk 55 gallon drums available.

**Quantum Growth  
& Turf Formula**

**Best Practice**

**Quantum Growth  
& Turf Formula**

**Best Practice**

One treatment with a combination of only 3 ounces of Quantum Growth and 6 ounces of Neptune's Harvest Turf Formula per 1,000 square feet resulted in significantly better root growth, turf density and turf quality compared to best practice.
