

WONDER SOIL®

WONDER SOIL® is a light weight compressed soil alternative which promotes a stronger root system, faster germination and enhanced plant and turf growth. WonderSoil is available in multiple sizes and formulations for various growing applications. When water is added, WonderSoil expands up to 8-times its original volume. The inclusion of water saving polymers allows a savings of up to 50% in water, labor, and energy for up to 7 years. Our products promote exceptional success for both the novice and professional.

A comparative study of Wonder Soil versus conventional soil using the same grass seed was done at Floyd Lamb Park in Las Vegas, NV in April of 2013. 20,000 square feet were divided in half and treated with or without WonderSoil.

After just 7 days, Wonder Soil had already reduced watering by 50% with vastly superior results!

Conventional Soil

WONDER SOIL

200,000 lbs. of Soil. 3,000 lbs. of WonderSoil.
9 Full Truckloads. 1 Truckload.
30 Hours to Spread. 3 Hours to Spread.

WonderSoil is a complete compressed soil alternative containing: Coco Coir, Worm Castings, Kelp, Micro- and Macro-Nutrients, Mycorrhizal Fungi and Water-Saving Polymers.

Products range in size from Seed-Starting Pellets for small applications to large Super Sacks for professional growers.
