Mole & Vole Repellent

Moles Eat Meat - Voles Eat Vegetation

What it does:

Put an end to the destruction caused by moles, voles and gophers with I Must Garden's Mole & Vole Repellent. Now you can safely and effectively put an end to the damage to your lawn, flower beds and plants with our all natural repellent.

Where to use:

Lawns, flower beds and everywhere moles, voles or other ground animals are causing issues.

What it contains:

I Must Garden Mole & Vole Repellent contains a strong mixture of 20% castor oil enhanced with Peppermint and Cedar essential oils.

How to use:

Apply the repellent in sections over time, methodically moving the pests off your property towards an exit point. This allows the animals to relocate from a treated area to an adjacent un-treated area. Since the animals have an option of moving to an untreated area, they simply relocate without causing further damage.

How often to apply:

Divide property into thirds apply in first section , wait 5-10 days before moving on to the each section.

Granular

**20% Castor Oil Blend
with Botanical Oils**

Also Repels:

**Gophers, Armadillos
Ground Squirrels
and other burrowing animals**
