**PRODUCT USE INFORMATION**

grubGONE!® G is a biopesticide product. When applied directly, it is a active ingredient (Arius galleriae strain SDS-502, Bacillus thuringiensis (Bt) subspecies galleriae strain SDS-502). Use grubGONE!® G only on turfgrass areas, at label rates. Maintain adequate soil moisture before and after application. Apply grubGONE!® G at label rates to control annual white grubs upon ingestion of Bt subspecies galleriae strain SDS-502. Insect mortality varies with larval size and may be less than 100% because of larval resistance to the Bt strain used.

**RESISTANCE MANAGEMENT**

grubGONE!® G is labeled for the control of annual white grubs. When used alone, Bt.galleriae will leave a small number of larvae to serve as a reservoir for future damage, however, annual white grubs are known to be unusually susceptible to the strain of Bt.galleriae used. It is recommended that a product containing a non-Bt control product be applied in conjunction with grubGONE!® G to control for future larval infestation. The effectiveness of grubGONE!® G in reducing larval populations decreases as the period between applications increases.

**APPLY TO TURF GRASS**

Site of Application: grubGONE!® G can be used in applications to lawns and ornamental turf grasses found in and on any adjacent or bordering areas (e.g., grounds, recreation areas, backyard, and industrial areas), to control grubs. grubGONE!® G is labeled for use in ornamental garden areas.

Restrictions: Do not apply more than 2 lb 14 oz of grubGONE!® G per acre of turf at any one application. 

**APPLICATION TO ORNAMENTAL PLANTS GROWN IN NURSERIES, FIELDS, GREENHOUSES, OR INTERIOR PLANTSCAPES**

Site of Application: grubGONE!® G is only to be used in applications to nursery, field, greenhouse, or interior plant ornament graminaceous plants. The plants may be field or container grown.

Restrictions: Do not apply more than 1 lb 14 oz of grubGONE!® G per 100 sq ft of field area per application to any ornamental plant grown in nursery, field, greenhouse, or interior plantscape.

**APPLICATION TO LANDSCAPE ORNAMENTAL PLANTS**

Site of Application: grubGONE!® G is only to be used in applications to landscape ornamental plants. Do not apply to fields, nurseries, greenhouses, or interior plant ornament graminaceous plants.

Restrictions: Do not apply more than 1 lb 14 oz of grubGONE!® G per 100 sq ft of landscape ornamental plant area per application.
